Environmental Footprint

Reducing the school's environmental footprint

Data is sourced from school's annual utilities return and is reliant on the accuracy of these returns.

Dimbulah State School is committed to reducing electricity usage and recycling materials where the local services are available and not financially limiting. The school collects aluminium cans from the community and delivers to Cairns on a monthly basis. Food-scrap are collects and not binned and added to school compost/garden preparation.

Signs are erected on most classrooms and work rooms in the school, reminding staff and students to turn off all electrical devices upon leaving the room. Staff are encouraged to close all doors when air-conditioners are in use. Regular discussions about electricity usage at staff meetings. Students are also actively involved through creating signs and posters for all rooms throughout the school. Regular discussion at staff meetings, and ongoing comparisons of electricity usage.

Paper is re-used throughout the school, and students are encourage to read on screen prior to printing (skill that is also critical for success with NAPALN online from 2018).

ENVIRONMENTAL FOOTPRINT INDICATORS		
Years	Electricity kWh	Water kL
2013-2014	104,323	12,037
2014-2015	105,282	11,804
2015-2016	118,379	12,509

The consumption data is compiled from sources including ERM, Ergon reports and utilities data entered into OneSchool by each school. The data provides an indication of the consumption trend in each of the utility categories which impact on the school's environmental footprint.
